

ABOUT

Mettle Ops is an 8(a), SDVOSB, WOSB company that specializes in developing and designing advanced Warfighter platforms. We are dedicated to upgrading and fortifying legacy systems with cutting-edge technology for the Department of Defense (DoD). Our team oversees

programs from start to finish, ensuring that our Warfighters have access to the most potent, dependable, and secure equipment available. Our unwavering commitment is to empower those who defend our nation by combining innovation and steadfast dedication in every mission.

WE ARE WARFIGHTERS. We bring that spirit to all that we do.

WE WERE SOLDIERS. The quality of our warfighter equipment is critical to their survival.

WE ARE DEDICATED. Our mission is to safeguard our troops and our country.

CAPABILITIES

ENGINEERING SERVICES

Mettle Ops boosts performance and compatibility through technological research and development; we extend military platform lifecycles.

DESIGN & INTEGRATION

Our team combines innovative design methodologies with seamless integration strategies, ensuring each project is executed with precision, efficiency, and with the client's unique needs at the forefront. We aren't just engineers - we're solution providers.

PROGRAM MANAGEMENT

Professional coordinators of subcontractors, procurement, supply chain, and logistics for military programs.

OBSOLESCENCE & SUPPLY CHAIN

We work with the DoD to ensure systems remain on the cutting-edge while improving reliability, reducing costs, and providing punctual delivery, enabling the DoD to confidently navigate the complexities of the modern defense market.
